immune system*

*Water soluble ingredients
for very rapid absorption*

*Improves health
and productivity*

Increases energy

Helping your livestock reach their genetic potential.

ALL NATURAL * EFFECTIVE

Boviglo

Increase Herd Health and Profitability on your Farm

Nature's Wave products are a mix of prebiotics, natural plant enzymes, vitamins and premium processed minerals - which eliminates the need for additional **probiotic** supplements. Our proprietary manufacturing process yields us a highly absorbable substance that increases feed conversion.

The benefits of using Boviglo.

Supplementing with Boviglo has shown to improve general well-being, strengthens immune and digestive systems, minimizes effects of e-coli, pneumonia, cryptosporidium, staphylococcus and digestive scours. Boviglo increases butter fat percentage, milk protein, and decreases somatic cell counts. It also improves heat detection and cleaning after birth.

Our Plant Enzymes occur naturally from a special formulation of barley extracts, and are not derived from mold, or artificially produced like so many other enzymes.

This enhances the natural micro flora in your cattle's digestive tract.

Our vitamins special *water soluble* form ensures very **rapid absorption**.

Our recommended feeding rates are based on actual farm trials, and ensure effective results for your investment.

We recommend adding to feed or water daily:
Pregnant cow.....10-15 ml
two weeks before calving
Lactating cow.....10-15 ml
for 30 days after calving, then reduce to 7-10 ml until re-bred and milk production achieved.
Newborn calves.....3 ml
Weaned/ veal calves.....3-4 ml
Replacement heifers.....5 ml
Breeding bulls.....15 ml
