

# DAIRY CALVES

## Vitamin, Mineral, Enzyme, Prebiotic and Probiotic Yeast in Powder and Paste

### Description

Dairymans Choice supplements are specially formulated for immunity and better overall health of young calves. Dairymans Choice contains vitamins, minerals, enzymes, prebiotics and probiotics for increased milk and milk replacer intake, better calf starter digestion and assists with metabolic and environmental challenges.

### Benefits

- Premix easily mixes with water, milk, and milk replacers for use in calves from the first day
- Paste is quickly administered and absorbed for use in calves from birth
- Decreases the incidence and severity of calf scours
- For use when scours occur
- Increases lactate utilizing bacteria in rumen development
- Increases average daily gain
- Increases feed conversion ratio
- Better fibre digestibility
- Starts calves off healthy and better prepared for future challenges
- Binds a broad spectrum of pathogens (E.coli, Salmonella) reducing their ability to attach to the intestinal mucosa
- Promotes positive first lactation milk production based on pre-weaning ADG
- Canada's original alternative to antibiotic treatments
- Made in Canada since 1994
- All products are registered with Canadian Food Inspection Agency

### Feeding rates
