

Give Calves a Head Start with Braden Start™

**BB90
Braden Start™
Grain Feeding
Bottle**

Tests show that calves started on grain the first day do better and gain weight faster due to accelerated rumen development.

The strong nursing instinct the first three days after birth enables the calf to quickly learn to eat grain from the Braden bottle. Clean, dry feed is efficiently dispensed with no spilled buckets or open feed troughs where contamination can build up.

Convenient, top-loading Braden bottle is made of clear strong plastic guaranteed for one year against breakage. Exclusive design of the rubber snap-on nipple lets the calf get virtually all of the feed with very little spillage.

One nipple lasts for 2 to 3 calves. The Braden bottle is suitable for most types of grain or starter mix.

BB90 Braden Start™ Grain Feeding Bottle
