CALF'S CHOICE TOTAL®

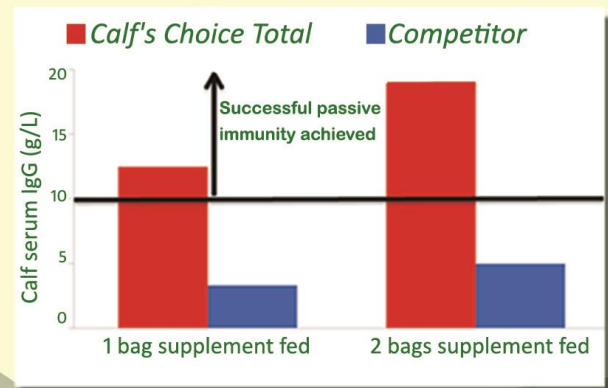

The Biggest & The Best

- CALF's CHOICE TOTAL® is a premium colostrum supplement that prevents Failure of Passive Transfer (FPT) of immunity from cows to their calves.
- This colostrum supplement contains spray-dried bovine colostrum that has been heat treated for safety. Therefore, it is free of all pathogenic bacteria and is safe to use, even in high health herds.
- When fed as directed, CALF's CHOICE TOTAL® gives calves a minimum of more than 10 grams of immunoglobulins (Igs) per liter of serum (Ig/L). Research has shown that this level protects calves from most common infectious diseases.
- CALF's CHOICE TOTAL® contains antibodies against a wide variety of common infectious organisms, including: *Escherichia coli* (E.coli), Bovine Rotavirus and Coronavirus, Bovine Viral Diarrhea Virus (BVDV), Bovine Respiratory Syncytial Virus (BRSV), Bovine Parainfluenza Type 3 Virus (PI-3V), and Bovine Herpesvirus-1 (BHV-1).
